GENERAL INFORMATION.

LOCATION.

Conover is a village in the Piedmont region of North Carolina and lies on two railways, the Memphis Division of the Southern and the Carolina Northwestern. Mail and transportation facilities are, therefore, adequate and telegraphic messages addressed "Conover, via Newton" are delivered promptly. Lying about 1100 feet above the sea level, this section of North Carolina is not infected with the fevers and the enervating influences of the lowlands near the coast. By charter it is made unlawful for any person to sell intoxicating liquors within two miles of the College.

BUILDINGS, GROUNDS AND EQUIPMENT.

The College building occupies an elevated site within the town limits. It is a two-story frame building containing a large chapel-hall and rooms for the Library and the Preparatory classes on the ground floor, and above there are four lecture rooms with a small laboratory. The Dormitory, situated on the campus, is a brick structure containing sixteen rooms and thus offers accommodations for a number of students. The Campus embraces seven acres amply supplied with shade trees.

The class-rooms are furnished with patent desks, maps for ancient and modern geography, etc. The Chemical and Physical Laboratories have been stocked at considerable expense, and an annual appropriation enables the authorities to add yearly to the store.

Recent donations have augmented the Library considerably and it now offers to the student some means for general and supplementary reading, and for reference.

CONTROL AND GOVERNMENT.

The College is controlled by a Board of Trustees and discipline is exercised by the President of the school and the Faculty. The Board of Trustees is composed of members of the English Evangelical Lutheran Synod of Missouri and other States and of men in sympathy with the work of this Synod.

The religious teaching in the school is strictly in agreement with the Confessions of the Lutheran Church, and the discipline exercised is, therefore, thoroughly Christian. The course in religion is not, however, obligatory, and those who, for good and sufficient reasons, wish to be dispensed from all or part of this course, will be made welcome and accorded every privilege enjoyed by others.

DEPARTMENTS AND COURSES OF STUDY.

COLLEGE AND HIGH SCHOOL.

While due regard is had for the abilities and opportunities of the individual student, thorough work is insisted upon in all departments. The Account of Work Done and the Outline of Courses are true statements of what has been done and of what is required.

The Faculty of the College, by and with the consent of the Board of Trustees, "have the power of conferring the degree of Master of Arts, and the degrees and distinctions of less dignity than Master of Arts, which are usually conferred by colleges," but no degree will be conferred except after honest and successful effort on the part of the candidate.

The College offers the following courses:

I. *The Ancient Classical Course:* Requires graduation in English, Latin, Greek, German, French, History and Political Economy, Mathematics, Mental and Moral Sciences, Natural Sciences. Hebrew is optional. Ladies may substitute an approved equivalent for Greek.

II. *The Modern Classical Course:* Requires graduation in

English, Latin, German, French, History, Mathematics, Mental and Moral Sciences, Natural Sciences. Elementary Greek, and Political Economy are optional. Ladies may substitute for Advanced Mathematics.

III. *The Scientific Course:* Graduation in English, Latin, German, French, History and Political Economy, Mathematics, Mental and Moral Sciences, Natural Sciences. Students may make approved substitution for Advanced Latin.

The time required to complete one of these courses, beginning with Class A, is six years.

IV. *The Normal Course:* Requires completion of course as prescribed for Sophomore Class in Ancient Classical Course in English, German, History and Political Economy, Mathematics, Natural Sciences; also graduation in Elementary Latin, Mental and Moral Sciences. Optional are Elementary Greek, Elementary French, and Advanced Natural Sciences.

The time required to complete this course, from Class A, is four years.

V. *The Elective Course:* In all classes a student may outline his own course, subject to approval. However, English is obligatory throughout, and also Mathematics to end of Sophomore year. In addition to these obligatory branches, the student must elect enough studies in his course to give him an aggregate, per week, of fifteen lessons or more.

PREPARATORY.

The classes in this department offer facilities for the training of children from the earliest year, and the aim is to place these classes in charge of one competent teacher. During the past year the work in this department has been done, largely, by the teachers in the College.

OTHER DEPARTMENTS.

There was no Department of Music in connection with the school during the past year, because facilities for the study of

music were offered elsewhere in town.

A Business Department has not been instituted, thus far, on account of lack of demand.

SOCIETIES.

Secret fraternities are not tolerated. Membership in the two literary societies is, as a rule, obligatory and the students are encouraged to look upon the work done for the meetings of their respective society as part of their regular work.

EXPENSES.

The outlay of money for a year of ten months, forty weeks in all, is small, as can be seen from the following :

TUITION FOR MONTH OF FOUR WEEKS.

High School Classes	$1.50
Freshman and Sophomore	2.50
Junior and Senior	3.00
Room-rent	.25
Board (calendar month)	6.50
Laundry (calendar month) about	1.00
Incidental Fees (for year)	1.00
Books, about	15.00

Fuel, Light and Medical Expenses are extra but are, in ordinary cases, small. The rooms in the dormitory being unfurnished, the student should bring the necessary furniture and clothing, or come prepared to purchase the same. Books can be bought from the agent at the College for cash at publishers' rates.

Students that secure other students, receive a reduction of one-third on their own tuition for every one whom they induce to matriculate, but only after all tuitions of all parties are paid.

No one is allowed to enter school who has one year's tuition or more unpaid, except by consent of the Board.

In order to encourage the attendance of more than one student from a family, the Board has decided to offer special inducements to such students. These reductions, to be made only in case all dues are settled by the end of the school-year, will be made known on application.

The rates in the Preparatory Department are from fifty cents to one dollar a month according to the studies taken up. For every branch taken by a Preparatory scholar in the High School classes, twenty-five cents a month additional will be charged.

MATRICULATION AND PROMOTION.

Applicants for matriculation will be entered by examination into any class for which they show themselves prepared. Those who are not known to some member of the Faculty must present acceptable testimonials as to character and, when possible, also certificates from schools attended in the past. Those who live at a distance should write to the President of the school for particular information before appearing in person.

The basis of promotion is the result of the examinations at the end of the year, combined with the term averages. Deportment is graded, like examinations, on a scale ranging from 0 to 100. Written reports are issued at the end of every term to show the record made by the student in that term.

ANNOUNCEMENT.

The school-year 1900-1901 will begin September 5th. Applicants for admission should present themselves for examination by September 4th.

A REQUEST.

The authorities of the school kindly request their friends to aid in the spreading of the catalogue. Requests for catalogues will be gladly honored and names and addresses of prospective students thankfully received.
